

<< Задача 1.2.7 >>

Условие:

7. Проинтегрировать уравнения движения маятника Фуко $\ddot{x} = -kx + \Omega \dot{y}$, $\ddot{y} = -ky - \Omega \dot{x}$. Найти тангенциальные и нормальное ускорения.

Решение :

<< Распишем данные уравнения ускорений по координатам от времени >>

$$\partial_{t,t} x[t] = -\kappa x[t] + \Omega \partial_t y[t]$$

$$\partial_{t,t} y[t] = -\kappa y[t] - \Omega \partial_t x[t]$$

$$-\kappa x[t] + \Omega y'[t]$$

$$-\kappa y[t] - \Omega x'[t]$$

<< Для нахождения уравнения движения, проинтегрируем уравнения, записанные выше, тем самым происходит переход к решению дифуров >>
